

# Website Vulnerability Assessment

Uncover vulnerabilities in your website and protect your organisation.

## Get the facts about your website security

While website security has come a long way - no website is 100% secure. Find out where your vulnerabilities lie with Optec's Website Vulnerability Assessment. Through our assessment, you'll gain a better understanding of your website's security risks and receive expert advice on how to address any vulnerabilities.

An **Optec Website Vulnerability Assessment** can help you:

- Uncover weaknesses, backdoors and malicious code in your website
- Identify DoS/DDoS vulnerabilities
- Find website bugs
- Validate website security controls
- Ensure compliance with the latest regulations

## Strengthen your website's security

With Optec's Website Vulnerability Assessment, you can quickly and cost-effectively validate your website current security controls and assess potential risks. An Optec cybersecurity expert will analyse your website for vulnerabilities and provide a comprehensive report that outlines key security risks and provides recommendations for strengthening your website security. Your assessment can be completed remotely, so there's no need to be in the office.

### What's included:

- Scoping call & scope documentation
- Full scan of your website
- Comprehensive report and expert security recommendations

### Ready to secure your website?
