Managed Secure SD-WAN

Increase network availability, security, control and insights for your organisation.

Times have changed, and businesses are more heavily relying on the cloud and SaaS applications. Rather than connecting back to the corporate data centre to access business applications, today's users are better served by accessing applications in the cloud. That's why more organisations are moving away from traditional WAN to software-defined WAN (SD-WAN) to simplify WAN, decrease costs, and improve performance.

Yet, implementing and managing a secure SD-WAN can be a time consuming and complex task. With Optec's Managed SD-WAN service, you can confidently move to secure SD-WAN and make it easier to maximise performance while minimising overhead costs.

Optec's **Managed SD-WAN** leverages Fortinet's best-of-breed edge devices to transform and secure all WAN edges and is backed by industry-leading service-level agreements and the expertise of our highly trained team of engineers.

Lower Costs, Improve Performance, and Bolster Security

Optec Managed SD-WAN provides you with everything you need for your SD-WAN solution, for a simple, transparent monthly price. Our solution covers everything from hardware and virtual appliances through to ongoing management and monitoring from our skilled engineers. With Optec's Managed SD-WAN solution, you can rest assured your network is achieving the highest quality performance, while empowering your IT team to focus on innovation and other business-critical projects.

Our SD-WAN specialists can help guide you on your journey to a cutting-edge SD-WAN solution with a customisable approach. You can select specific SD-WAN services or let us do all the heavy lifting for maximum performance and flexibility.

Benefits of Managed SD-WAN

- Significantly reduce network costs

- Simplify WAN management

- Deliver a better user experience

- Enhance network security

- 24x7x365 infrastructure monitoring

- Zero-touch configuration

- Vendor agnostic support

Consult & Design
We'll work with you to understand your business and technical requirements and design an SD-WAN solution that fits your unique needs. To make sure that you have your SD-WAN solution up and running as quickly as possible, we have three core packages available to help define your base build.

Selection & Procurement
We'll help you select and procure the right SD-WAN hardware or virtual appliances you need for your custom solution. We partner with leading SD-WAN providers like Fortinet to ensure you have access to the top-of-line secure SD-WAN technology solutions.

Configuration & Installation

Our expert engineers will configure your SD-WAN solution to your specifications. Our engineers can also manage and test the installation of applications at your site(s), or you have the option of doing a self-install.

Mangement & Monitoring

Once your SD-WAN is up and running, our team can monitor the availability of the SD-WAN 24x7x365 to maintain its operation and optimal performance. As part of our managed service, you also have the option to raise change requests.

Managed SD-WAN from SD-WAN Specialists

At Optec, our engineers are highly trained in SD-WAN technology and can help you select and design the optimal SD-WAN solution for your organisation. Our agile team can deliver the most complex of projects, with the flexibility to deliver bespoke solutions tailored to your organisation's unique infrastructure.

Additionally, as a **Fortinet Expert MSSP Partner with an SD-WAN Specialization**, you can rest assured that our technical team possesses expert SD-WAN knowledge and capabilities, which can be used to help you achieve WAN optimisation, increased cloud application performance and visibility, and a simplified brand network using Fortinet's industry-leading solution.

SPECIALIZATION
SD-WAN

Fortinet Secure SD-WAN is the only solution that integrates SD-WAN, next-generation firewall (NGFW), advanced routing, and zero trust network access (ZTNA) access functions. Its proven technology is backed by numerous third-party recognitions from industry analysts; Fortinet was named a Leader in the *2021 Gartner ® Magic Quadrant for WAN Edge Infrastructure ™* and ranked #1 for three out of five use cases in the *2021 Gartner ® Critical Capabilities for WAN Edge Infrastructure ™*.

Ready to Transform your WAN?

Our team of managed services experts is ready to help you unlock cost-savings, improved performance, and enhanced security with SD-WAN. Learn more about our SD-WAN solutions by visiting our website or get in touch with our team to discuss your requirements.
